CEEQUAL NEWS July 2015

Good Afternoon Support

Welcome to this latest edition of the CEEQUAL newsletter.

- [Upcoming Assessor training courses](#)
- [Using CEEQUAL on very large and/or long duration projects](#)
- [Supply Chain Sustainability School](#)
- [IEMA webinars](#)
- [Recent case studies](#)

Training Courses

CEEQUAL has a full schedule of training courses throughout the remainder of 2015. To reserve a place please follow the links in the table below, complete the appropriate application form and send it to [Sarah Macpherson](#). Please also pass these dates onto colleagues who might be interested in becoming CEEQUAL Assessors.

Training Course	Date	Location
Project Assessor (Limited spaces remaining)	16 - 17 September 2015	London
Term Contracts Assessor	29 September 2015	London
Project Assessor	13 - 14 October 2015	York
Project Assessor	4 & 5 November 2015	London

Normally, Term Contracts Assessor Training Courses are held on demand. However, we have fixed the above Term Contracts Extension Course in London for Assessors already trained on CEEQUAL for Projects. If that date is not suitable for you or you need a full two-day Term Contracts Course, please let [Melanie Manton](#) know. We will then work to arrange a course as soon as we have a minimum of six people interested.

Finally, we are planning a Project Assessor workshop in **Qatar** for October 2015. The details and dates are still being finalised. If you are interested in attending then please contact Melanie Manton as soon as possible.

Using CEEQUAL on very large and/or long-duration Projects

For most projects that apply for a CEEQUAL Award, the usual Whole Team Award assessing the role of the client, designer and principal contractor is sufficient to give an overall score. Multi-package assessments with separate scores and Awards for each package are used when it would, for a range of reasons, be impractical to assess a large and complicated project as one assessment.

The multi-package assessment process enables separate CEEQUAL assessments of individual packages of works to be completed. The individual package scores are then aggregated (on the basis of the individual package contract values) to give an overall Whole Team Award for the project.

For more information on multi-package assessments including the benefits of using them, incorporating the use of Interim Client & Design Awards on multi-packages, calculating the Overall project score, and the fees involved, please see our new multi-package information sheet which is [available in the downloads section of the website](#).

17 multi-package assessments were used at the Olympic Park and scored between 75.2% and 94.7%. The overall weighted score was 93.8% ('Excellent').

CEEQUAL webinars hosted by IEMA

The two successful IEMA webinars delivered in May and June by CEEQUAL's Roger Venables are available to view on the IEMA website.

'[The Essence of CEEQUAL](#)' introduces the CEEQUAL assessment process, reviews CEEQUAL's technical coverage, highlights case studies of completed projects and describes the reported benefits of using CEEQUAL.

'[Getting to Grips with how CEEQUAL works](#)' is a more detailed look at the CEEQUAL assessment process, the technical coverage of the scheme and the scoring mechanisms in CEEQUAL.

Both webinars last for one hour and whether you are new to CEEQUAL, or if you just looking to refresh your own knowledge or introduce someone else to the CEEQUAL process they are well worth a watch.

Supply Chain Sustainability School

As we have previously featured, CEEQUAL has become a Knowledge Partner of the Supply Chain Sustainability School (SCSS) Infrastructure Leadership Group, to support the School in

setting up a programme dedicated to the infrastructure sector.

Users of the SCSS website will also find a CEEQUAL E-learning module there, and CEEQUAL's Philip Charles will be delivering another 'Getting to grips with CEEQUAL' half day workshop on the morning of Wednesday 30th September in central London. More details for this free event, including registration details, can be found on the [Supply Chain School website](#).

Roger Venables reinforcing the importance of collaboration in delivering sustainable solutions at the infrastructure launch event.

Recent case studies

[Demolition of Wan Chai West Preliminary Treatment Works, Excellent \(91.5%\), Whole Project Award.](#)

[Bristol and Bath Science Park \(SPark\), Very Good, Construction Only Award.](#)

[Antrim Environmental Improvement Scheme, Very Good, Construction Only Award](#)

[Spårväg City Line 7 accessibility upgrade: part 1, Excellent \(86.4%\), Construction Only Award.](#)

[A453 Widening \(M1 Jct 24 to A52 Nottingham\), Excellent \(80.4%\), Whole Team Award.](#)

[A6 to Manchester Airport Relief Road, Excellent \(86.5%\), Interim Client & Design Award.](#)
